Composting in Erie

The Town of Erie will **not** host a leaf and pumpkin composting event this year. However, Erie residents can still compost leaves, yard waste, and pumpkins **year-round** at the Recycling Center for free.

- Leaves, pumpkins, and yard waste must be removed from bags before placing them in the compost bins. No bags—including paper bags—are allowed in the bins. Residents should take bags with them after dumping the contents.
- Leaves should **not** be raked into the gutter or street, as it impacts the stormwater system.

For more information, residents can visit the Recycling Center webpage or email SustainableErie@erieco.gov.

Trash Removal Reminder:

The Association has received concerns regarding owners that are either placing their trash out too early and/or owners that do not have their trash properly contained and are placing their trash receptacle and/or bags on the right-of-way sidewalk. As a reminder, all trash bags need to be properly tied and all trash cans should have a lid to help eliminate blowing debris and animal access. Also, we ask that your please do not block the sidewalk access.

Also as a reminder, trash cans should be stored in your garage unless it is trash service collection day. It has been noted that many residents are placing their trash cans on the side of their home, visible from the street The Association would appreciate your cooperation in storing your trash cans in your garage and not on the side of your home.

Microgreens: Iriend or Iad? A New Year's Growing Trend

Nichole Rairigh, CSU Extension Master Gardener, author and photo credit

As winter plods on, planting something to beat the winter blues is an attractive idea. Many of us are thinking about fresh ways to bring vegetables into our lives, though outdoor vegetable gardening is a few months away. Enter microgreens: tiny, nutrient-packed plants that promise big rewards in a short time. Are they a passing trend, or here to stay? Let's explore.

What Are Microgreens?

Microgreens are small, edible plants harvested at a early stage of growth. They are slightly larger than sprouts but should not be confused with them. These little greens include a variety of vegetables such as mustard, radish, basil, Swiss chard, kale, cabbage, arugula, and cress. There are also specially designed blends tailored to top sandwiches or salads.

One of the best things about microgreens is how quickly they grow. From seed to harvest, the whole process takes just 10 days. For those new to gardening, especially kids, growing microgreens is an exciting activity. Watching the plants grow so quickly can inspire young gardeners and teach them about the cycle of plant life—right in the comfort of home.

Why Grow Microgreens?

Microgreens are rarely sold in grocery stores and when they are they are expensive due to fragility of the product and packaging required. Microgreens grow incredibly fast providing a fast payoff in the doldrums of winter. Plus, they are nutritional powerhouses containing vitamins A, B, C and antioxidants.

How to Grow Microgreens

Seeds can be procured at your local garden center. I have recently tried cilantro microgreens and the Jazzy Mix offered by Botanical Interests®. For step by step directions with pictures, visit An Edible Project for Winter Green Thumbs – Pueblo County Extension.

Jazzy Blend

Growing microgreens is easy and doesn't require much space. Here's a simple step-by-step guide to get you started:

- 1. **Procure Seed Starting Mix or Potting Mix** Start by moistening the mix.
- 2. Fill a Container You can use a six-pack from your local nursery or even clear to-go containers with lids. Anything that can hold the mix and allow for drainage works.
- 3. Sow the Seeds Sprinkle the seeds generously over the soil.
- **4.** Water Use a spray bottle to moisten the soil.
- 5. Cover Place foil or a lid over the container to block light for the first day. This encourages leggy plants that will reach for the light, making them easier to harvest.
- 6. Light Exposure On day two or three, move the container to a sunny window or under grow lights.
- 7. Harvest Once the first true leaves appear (after the cotyledons, baby leaves), it's time to harvest. Snip off the greens with clean scissors just above the soil level.

How to Harvest and Store Microgreens

Once your microgreens are ready, use clean scissors to trim them just above the soil level. Be sure to harvest them fresh, as their shelf life is short. If you're not using them right away, store them in a container lined with a paper towel in the fridge. They'll stay fresh for about 3-5 days if kept cool and dry. Wash before eating.

Microgreens: A Fun, Low-Time Commitment Winter Gardening Project

Microgreens offer an exciting way to keep your gardening spirit alive during the winter months. Whether you're a seasoned gardener or a beginner, these little plants are a fun, fast-growing project that don't require a lot of space or time.

Why not give microgreens a try? They may just become your new favorite kitchen staple. Happy growing!
